Construction Connectors & Fasteners

Framing - Structural Applications				
Part	Model #	SST #		Description & Use:
Hurricane Strap 18"	HS-18	LSTA-18		Hurricane Straps & Ties - Hurricane straps and ties are made for protecting structures from the uplift caused by high winds - particularly along the coastlines and during storms. They reinforce transition points between beams and floor systems, floor systems and framed walls, framed walls and roof systems, and they keep floor joists from moving side to side during storms. Storm Greeter utilizes - but is not limited to - products made by Simpson Strong-Tie.
Hurricane Strap 24"	HS-24	LSTA-24		
Hurricane Strap 36"	HS-36	LSTA-36		
Hurricane Strap Twist 16"	HST-16	LTS-16		
Hurricane Strap Twist 18"	HST-18	LTS-18		
Hurricane Strap Twist 20"	HST-20	LTS-20		
Hurricane Tie	HT1	H1

Reinforcing Strap 36"	RS-36	20g Pstrap		
Reinforcing Strap 48"	RS-48	20g Pstrap		
Stinger Nails for Framing, Decking, and for Joist Hanger Installation				
12p Spiral Decking Nails Coated 1lb	SPNAIL-12-1	N/A		Stinger Nails - are galvanized nails coated with a tough polyceramic coating. During the nailing process, the polymer warms up and bonds with the wood. Stinger Nails will not rust or corrode and will not experience rust streaks and stains on your decks, piers, or siding. One of the leading hot-dip galvanizing nail manufacturers in the world has this disclaimer as part of their warranty: <i>"...these nails have been double-dipped in molten zinc by our exclusive process. These nails are further warranted against red rust for the lifetime of the project when used in routine, residential applications not exposed to salt-spray or other extremely corrosive environments."</i> What kind of warranty is that? Use Stinger Nails wherever you want to use them, without worry!
12p Spiral Decking Nails Coated 5lb	SPNAIL-12-5	N/A		
12p Spiral Decking Nailed Coated 50 lb	SPNAIL-12-50	NA

Joist Hanger Nails Coated - 1 lb	JHNAIL-1	N/A		
Joist Hanger Nails Coated - 5 lb	JHNAIL-5	N/A		
Joist Hanger Nails Coated - 50 lb	JHNAIL-50	N/A		
Insulated Concrete Foundation Applications				
Mounting Plate - ICF Installation	MPICF	ICFVL		ICF Brackets/Ledgers - Insulated Concrete Foundations, formed with styrofoam blocks, utilize the mounting plate to provide an anchor to which the ledger brackets are attached. The mounting bracket is inserted through the styrofoam and will be embedded in the concrete. The chemicals in the concrete immediately begin to eat away at the galvanizing, and eventually the bracket itself. Not so with Storm Greeter!
Wood Ledger Bracket - ICF Installation	WLICF	ICFVL-W or CW
